

Street Closure Modifications

Campbell Avenue Street Closure Will Change September 8

Please be advised that the temporary closure of East Campbell Avenue is changing effective September 8. The following frequently asked questions provide guidance on the street closure modifications.

What's changing September 8? The City will soon establish parklets that will entail removal of safety barriers to allow vehicle traffic on East Campbell Avenue Monday through Thursday with full street closure Friday through Sunday. This arrangement will continue over the next few weeks until the parklet installations are complete. Once parklet installations are complete, East Campbell Avenue will remain open all week.

What's a parklet? Street parking stalls with protective barriers for outdoor businesses.

Where will the parklets be located? See conceptual images on the back of this flyer for prospective locations. The City will adjust parklet layout based on need.

Will on-street parking stalls be available? Yes. On-street parking stalls not converted to parklets will be available for public parking as depicted in the images.

How long will parklets be in place? Following installation, parklets will be in place seven days a week until the layout is changed or discontinued. The City Council will periodically review and provide future direction.

When will parklets be available? The City is in the process of obtaining barriers. Until then, the limited number of existing barriers will be re-positioned to create parklets. Barriers will be placed as equitably as possible so that as many businesses as possible can utilize parklet areas. However, some businesses may not be able to utilize on-street parking spaces for parklets until more barriers are installed.

How can my business operate in a parklet? Apply for an encroachment permit with the Public Works Department. Apply online at mygovernmentonline.org or contact 408-866-2150.

What's the cost for an Encroachment Permit? Permit application fees will be waived.

My business has an Encroachment Permit for the street closure, do I need to re-apply?
Please contact the Public Works Department to extend your permit's expiration date upon request at no cost.

More details about the street closure changes are available at CampbellCA.Gov/CampbellOutdoors.
